

**Thomas F. Blaesi** is Vice President of the global marketing group, which is chartered with defining, driving, and promoting Silvaco's leadership in the TCAD, EDA and IP market. Key areas of responsibility include strategic planning, corporate marketing, product marketing, market research, brand management, corporate communications, and ecosystem alliance programs.

Thomas joined Silvaco in October 2017 with more than 25 years of experience in corporate strategy, business development, and marketing in semiconductor, and electronic design automation industries. He has led major projects in SoC platform-based design, system-level design, and design for manufacturing in addition to hands-on experience in custom and semi-custom chip design and development.

Most recently, Thomas was the managing partner at Zeema Technologies. Before that, he served as CEO of Chipvision, and held various senior business and technical positions at Cadence, Synopsys, and LSI Logic.

Thomas holds a BS in electrical engineering and computer science from Hochschule Furtwangen University, Germany.
